

THE D.I.Y WORKSHOP

If you're planning to install your new IKEA kitchen yourself, the team at Luke Watson Design & Assembly can assist in getting your project set up and started by providing you with expert knowledge and advice, simplifying what may seem an overwhelming task.

The D.I.Y Workshop includes:

- Cut and install all IKEA suspension rails according to the supplied installation plan (highly recommended).
- Arrange and organise all flat packs systematically and assist with identification of all items.
- Introduction and guidance for assembly and installation of key components. Including base and over-head cabinetry, drawers, doors and kickers. Additional training may be offered depending on the layout and complexity of your kitchen.
- Information sheets on installation tips and traps to avoid when installing your new IKEA kitchen.
- Contact details for supporting trades (plumber and electrician) that know and understand the IKEA METHOD System.
- Ongoing advice if required, via phone or email.
- Startup Kit to assist with your new Kitchen Renovation Project.
